The Nanning station of the meteorological department of the Kwangsi Military District was ordered to send meteorological reports of the Kwangsi area in the following manner:

25X1

- a. Test balloons were to be released by the Nanning station at fixed times each day in order to obtain data from altitudes of 4,000 to 5,000 meters by means of radiosonde.
- b. Reports for the coastal stations were to be consolidated. This information was to be transmitted to the Central and South China Navy Command and to the central meteorological station only. The general meteorological report for Nanning was to be broadcast daily with the forecast also to be released as a general news report.
